C-100 Battery Pack Auto Charge DC Cable

Battery Power Solutions' Auto Charge DC Cable allows you to directly recharge your C-100 Battery Pack via the cigarette lighter/power socket of a vehicle.

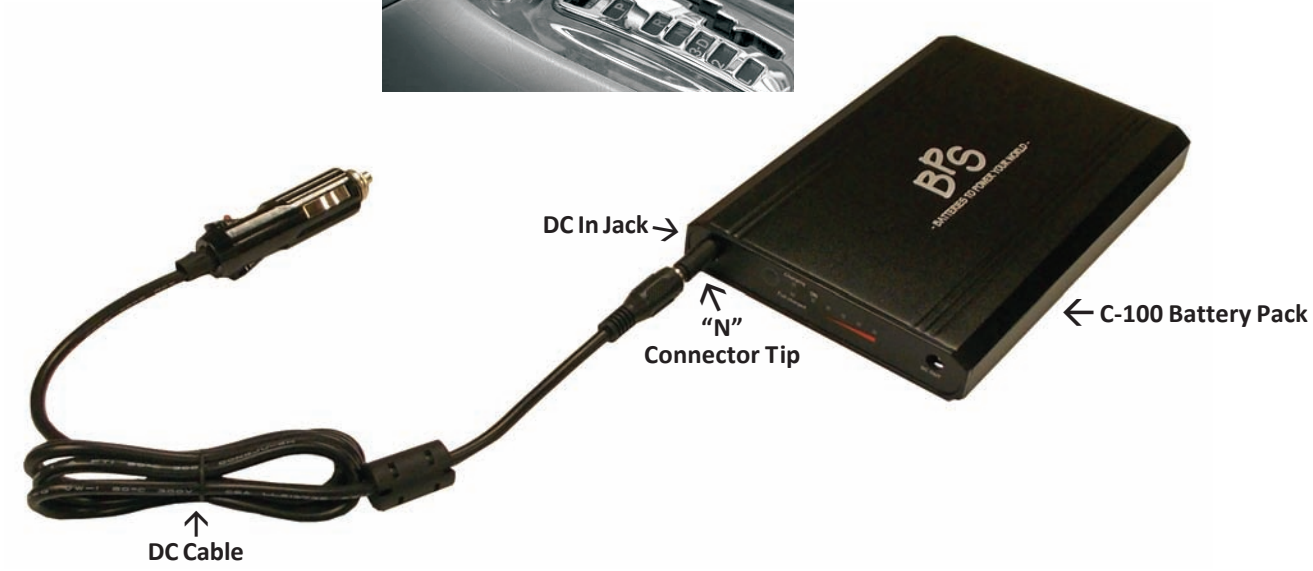
CHARGING INSTRUCTIONS - SINGLE BATTERY CONFIGURATION

- Locate the Connector Tip labeled "N" in your C-100 Battery Pack Kit.

  Each Connector Tip included in the C-100 Battery Pack Kit has a very small letter embossed on the top of the black plastic portion of the tip. Please note this letter can be difficult to read but it is present.
- Insert the "N" Connector Tip into the Auto Charge DC Cable.
- Insert the Auto Charge DC Cable with "N" Connector Tip attached into the DC In Jack of the Battery Pack.
- Turn the vehicle on and insert the cigarette lighter plug end of the Auto Charge DC Cable into the cigarette lighter/power socket of the vehicle to begin the charging process.

  It is important that the vehicle be running during the charging process to prevent draining the vehicle's battery and to ensure the Battery Pack receives a full charge.

  The approximate recharge time when the Battery Pack is fully discharged is 4-5 hours (per battery).
- When charging is complete remove the Auto Charge DC Cable from the cigarette lighter/power socket.



C-100 Battery Pack Auto Charge DC Cable

Battery Power Solutions' Auto Charge DC Cable allows you to directly recharge your C-100 Battery Pack via the cigarette lighter/power socket of a vehicle.

CHARGING INSTRUCTIONS - DUAL BATTERY CONFIGURATION

- Locate the Connector Tip labeled "N" in your C-100 Battery Pack Kit.

  Each Connector Tip included in the C-100 Battery Pack Kit has a very small letter embossed on the top of the black plastic portion of the tip. Please note this letter can be difficult to read but it is present.
- Insert the "N" Connector Tip into the Auto Charge DC Cable.
- Insert the opposite end of the "N" Connector Tip into the DC Pigtail Cord (included with the Battery Pack Kit).
- Insert the DC Pigtail Cord into the DC In Jacks of both Battery Packs.
- Turn the vehicle on and insert the cigarette lighter plug end of the Auto Charge DC Cable into the cigarette lighter/power socket of the vehicle to begin the charging process.

  It is important that the vehicle be running during the charging process to prevent draining the vehicle's battery and to ensure the Battery Pack receives a full charge.
  The approximate recharge time when the Battery Pack is fully discharged is 4-5 hours (per battery).
- When charging is complete remove the Auto Charge DC Cable from the cigarette lighter/power socket and disconnect it from the Battery Pack.
